DENIS BAGRESOLZU BAYOR

SOFTWARE DEVELOPER | WEB & MOBILE APPLICATIONS | IT SUPPORT

Email: bayordenis766@gmail.com **Portfolio:** my-website-portfolio-ebon.vercel.app **GitHub:** github.com/bayordenis

PROFESSIONAL SUMMARY

Computer Science graduate from the University of Ghana with project-based experience in web and mobile development, desktop software, database-driven applications, and user-focused interface design. Enjoys turning practical requirements into usable digital solutions, from interface design and data handling to testing and deployment. Open to software development, IT, freelance, and collaboration opportunities.

TECHNICAL SKILLS

Languages & Web	Java, JavaScript, Python, C#, HTML5, CSS3, responsive web design
Frameworks & Apps	React Native, Expo, .NET Windows Forms, reusable UI components, app navigation
Data & Delivery	SQL/database concepts, database design, CRUD, REST API integration, Git/GitHub, Vercel, usability evaluation

EXPERIENCE

National Service Personnel | Zannoo International School, Ghana
Computing Education • Coding Club • IT Support • Website Development

• Teach Computing and support students in developing practical digital skills through classroom and coding-club activities.

• Provide technology support to the school and help identify digital tools that can support teaching and operations.

• Contribute to the school's website project as a team manager and developer.

SELECTED PROJECTS

EcoMart — Sustainable E-commerce Interface | HTML, CSS, JavaScript, Vercel

Designed and developed a responsive shopping interface featuring sustainability information, greener delivery defaults, and carbon-impact indicators; evaluated usability with users. Live demo · Source code

Mobile Applications | React Native, Expo, JavaScript

Developed practice apps including a task manager, fashion shopping app, and academic deadline organiser, working with reusable components, navigation, persistent storage, and API integration where implemented.

Nkwa Real Estate Expenditure System | Java, OOP

Business-system project for recording and tracking expenditure with validation and defined business rules.

Medical Appointment Booking System | C#, .NET Windows Forms

Desktop application project for managing patient appointments using structured forms and validation.

Mama D Kitchen Website | HTML, CSS, JavaScript

Restaurant website project focused on presenting a local business and its offerings through an appealing web interface.

EDUCATION

Bachelor of Science (BSc) in Computer Science — University of Ghana, Legon

PROFESSIONAL STRENGTHS

Analytical problem-solving • Communication • Team collaboration • Adaptability • User-focused design • Practical digital solutions
